

The new GrandeZZa 27 OC has an eye-catching design. She is designed to work well for practical boating on your own as well as being a great entertaining space with friends. The cockpit is open and inviting with exceptionally high standing headroom and ample seating for several people. The galley is well-equipped including a handy worktop extension and generous storage facilities.

The cabin works perfectly due to its open plan design, including two separate twin berths, adequate storage facilities and a separate toilet / shower compartment. Materials and colours are chosen with care, opening portholes and a deck hatch makes the interior bright and pleasant. Impressive performance, ergonomic helm and excellent driving response turn this beauty into a real masterpiece.
